

NEBRASKA PUBLIC POWER DISTRICT CURRENTS

SUMMER
2025

We are a premier energy provider bringing the best of public power to Nebraskans, powering everyday life and a brighter future.

Kearney account manager talks mobile app benefits

Grant Flamig
Retail Account
Manager

Welcome to this issue of NPPD's customer newsletter. I'm Grant Flamig, retail account manager. In addition to Kearney, I serve the communities of McCook, Alma, Minden, Elm Creek, Gibbon, Shelton, Ravenna, Loup City and Ashton. I began my career with NPPD in 2007, and before my current role, I was a distribution planner scheduler creating work orders for capital projects and line maintenance.

Communication and education are top priorities for me as I work with customers. I'm proud to help NPPD maintain low rates, high reliability, and provide outstanding customer service. NPPD strives to be a premier energy provider and to always be there when you need us.

So NPPD can better serve you, I encourage you to use NPPD's web portal and mobile app. This tool allows for text and email notifications to keep you informed. For example, you can sign up for paperless billing and get a text that your bill is ready, or you can receive notifications of upcoming planned outages. You can even set up usage limits and receive notifications when you approach that limit.

Take advantage of these and other options by logging in, selecting notifications, and setting your preferences.

To register for our mobile app, "NPPD On the Go!" you must have your account number, service address, zip code, and phone number ready. Search "NPPD" in the Google Play or Apple App Store. Click "Register" and continue by completing the account information.

Have a great summer, and remember to always put safety first!

Decisions we make today, are emPOWERING Nebraska's Tomorrow

Right now, Nebraska is at the heart of something exciting. Businesses are looking to expand or establish themselves here, and many choose to do so within NPPD's service territory.

To support this growth, we're embarking on a strategic program we call emPOWERING Nebraska's Tomorrow. This program is our forward-looking commitment to ensure our state has the energy infrastructure needed to thrive.

Several projects are rolled up under this program to meet current and long-term energy needs. Nebraska is not running out of electricity. We are responsibly, transparently and thoughtfully preparing for new and growing demand.

emPOWERING Nebraska's Tomorrow will strive to improve the state's quality of life without compromising reliability, affordability, resiliency and sustainability.

Visit www.nppd.com and select "emPOWERING Nebraska's Tomorrow" to learn more.

Tekamah receives Arbor Day trees

NPPD partnered with the Tekamah-Herman school system and others in the community to celebrate Arbor Day 2025. District teammates and the fourth-grade class gathered to plant six Autumn Blaze maple trees.

Following the down-and-dirty digging, a ceremony was held, with guest speakers and student presentations covering various Arbor Day topics.

Assistance fair reaches residents needs

NPPD recently held a one-day Community Assistance Fair for residents in and around Norfolk. The event offered a safe and welcoming environment to visit and ask questions about NPPD's services, including the Pennies for Power Program.

Search Pennies for Power on nppd.com to learn more about how you can apply to or contribute to the program.

"Our team recognized the need to bring people together and help guide and inform them about available resources," said Customer Services Leader Tomas Jimenez.

Other entities, including housing authorities, utility companies and other public services also shared information.

Let incentives upgrade your summer lawncare experience

Going electric with lawn and garden tools has advantages. Advances in battery technology have resulted in a variety of power-packed lawn and garden tools and equipment, including mowers, chainsaws, edgers, tillers and more. If you haven't considered upgrading, check out how to receive a 20% incentive!

The advantages are lower energy costs, less maintenance, quieter operation, eco-friendliness and non-toxic gas emissions.

Visit nppd.energywisenebraska.com to learn more!

IF THERE IS A DOWNED POWER LINE

THINK BEFORE YOU ACT

An overhead power line can become damaged or fall due to a severe storm. If you see a downed power line, take these actions:

-  **Consider all power lines energized and deadly.**
-  **Stay at least 50 feet away.**
-  **Call 9-1-1 or the utility to report the downed line.**
-  **Do not approach it or try to move it with another object.**
-  **Do not get out of a vehicle or cab.**
-  **Do not approach the scene.**
-  **Warn others to stay away.**
-  **Turn around and go another way.**
