Information on CT Equipment Scope

- 1) Resolution No. 26-10 adopted at the February 2026 Board meeting authorized management to execute a Reservation Agreement with Siemens Energy Inc., to provide three Simple Cycle Combustion Turbines and associated equipment for Beatrice Power Station (BPS).
- 2) Purchase is for three (3) “F” Class combustion turbine generator sets, each set capable of a nominal 239 Megawatts (MW) of summer capacity.
- 3) Contract negotiations are nearly complete for both technical and commercial terms.
 - a. Schedule is “ex-works” January/February/March of 2030.
 - b. Commercial Operation is targeted for June 1, 2032, for the first CT and shortly after that for the other two.

What a CT with Exhaust Stack Looks Like

Recommendation

Adopt resolution authorizing management to enter into a contract with Siemens Energy Inc., for the purchase of three (3) “F” Class Combustion Turbine (CT) generator sets, when said contract is in a form and substance acceptable to management and legal counsel, in an amount not to exceed the dollar amount presented during executive session held June 10, 2026.
