Energy is priced per kilowatt-hour (kWh), and the monthly energy and delivery charges you are billed each month are based on the total amount of energy used, as recorded by your electric meter. Depending on when you consume energy, a couple of RateWise options exist for our residential customers.

RateWise Time-Of-Use rate is based on not only your energy usage, but also when you use it. If you currently consume most of your energy during our off-peak and super off-peak periods, or are able to shift some of your usage to those periods, you could see savings on your monthly bill. All time-of-use periods are Central Standard Time (CST).

Winter Weekdays

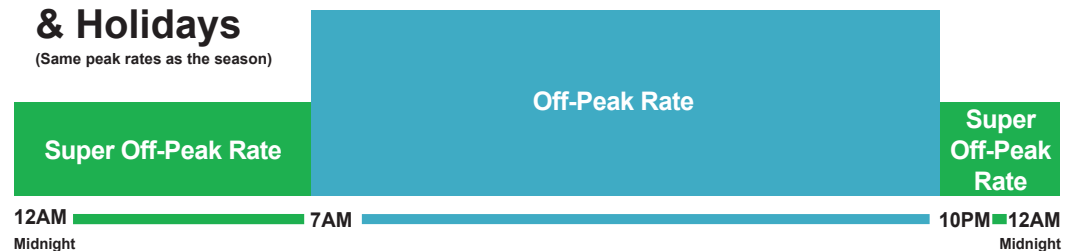

Summer Weekdays

Weekends & Holidays

(Same peak rates as the season)

The on-peak periods reflect the highest price you will pay per kWh, while the off-peak and super off peak periods represent less expensive kWh prices, respectively. The monthly energy and delivery charges you are billed each month will be based on the total amount of energy consumed during each timeframe as recorded by your electric meter.
